

Two events in tandem:

This year for the first time we are bringing together two popular organic events to allow more people to participate in both. The Soil Association's [National Soils Symposium](#) (25th November) will be focusing on resilience. The ORC [Organic Producers' Conference](#) has producer-focused technical, business and policy workshops on the first day (26th November), and a more specific focus on current research and innovation activities on the second day (27th November), with the aim of bringing producers, researchers, advisers and students together to make change happen!
